

# MIGHTY-MIN<sup>®</sup> 6.5 with AD&E FOR ALPACAS

## ORGANICALLY STABILISED ESSENTIAL MINERALS FOR ALPACAS

### WHAT IS MIGHTY-MIN<sup>®</sup>?

**MIGHTY-MIN<sup>®</sup>** is a liquid mineral supplement for livestock manufactured in the Ballarat country district of Australia by Westminster Pastoral Company (WPC) and distributed throughout Australia by **TNN Australia**.

**MIGHTY-MIN<sup>®</sup>** mineral supplements use quality organic stabilisation materials, some in the form of Lignosulphonates and Liquid Kelp, to achieve a safe and effective mineral supplement product that can last in the system of the animal for the longest possible time.

### NATURE AT WORK FOR YOU

Alpaca breeders love their animals, and **MIGHTY-MIN<sup>®</sup> 6.5** mineral range has been developed to maximise the health of all ruminants. Typically, 85-90% of all health problems stem from nutritional disorders or lack of nutrients. **MIGHTY-MIN<sup>®</sup> 6.5** helps eliminate these deficiencies not only in Alpacas, but sheep, cattle, goats, horses, dog, pigs and even chooks!

Everything that eats is missing out on some minerals as they have been leached or mined out of the soil. **MIGHTY-MIN<sup>®</sup> 6.5** has around 19 of these minerals to help bodily functions and enhance the digestive system of your animals.

Some farmers dose their animals with one or two of these necessary minerals, but it has been proven that nothing works alone. Life and health are all about balance. **MIGHTY-MIN<sup>®</sup> 6.5** supplies balanced mineral supplements that cover most bases. Users of **MIGHTY-MIN<sup>®</sup> 6.5** find that it reduces the need to use conventional worm drenches and improve fertility with higher weight gains and healthier, happier animals.

**TNN Australia** have a complete range of regenerative biological sustainable fertilisers, both granular and liquids to improve the health and viability of your soils for better results in cropping and pastures, horticulture, and viticulture, virtually anything that grows in the soil. Good soil grows anything well.

### WHAT IS IN MIGHTY-MIN<sup>®</sup> 6.5

- ♥ Zinc 8.5 g/L
- ♥ Cobalt 3.0 g/L
- ♥ Vitamins AD&E
- ♥ Manganese 6.5 g/L
- ♥ Iodine 0.11 g/L
